ALEZE TEXTILE

Lamination Solutions

**Superior Quality Raw Material, High Standards in Production
Excellence with Unique Functions**

Aleze Textile is a technical textiles manufacturer that offers its customers high-quality, reliability, innovative products, and comfort in the national and international home, medical, and hotel textile markets.

Since its inception, the company has been committed to prioritizing the industry's innovation needs, product certification requirements, and customer satisfaction. It aims to adapt to global changes, meet market demands promptly, and stay up-to-date with the evolving industry trends.

The Distinctive Mark of Aleze Textile

By providing comprehensive services provided at every stage, from laminated fabric to the packaged final product, Aleze Textile offers precise lead times, perfect alignment with product prototypes, and exceptional diligence in quality control processes.

Thus, Aleze Textile presents such a solid partnership experience and creates a sense of ease that allows customers to focus on their own sales and planning actions.

About Us.

Aleze Textile was established in 2014 in Denizli, in the Aegean Region of Türkiye, to operate in the home, medical and hotel textile industry. Being operating in a closed area of 3,000 m² with its state-of-the-art fabric lamination and confection line, Aleze Textile took its place in the international and domestic markets as a technical textiles manufacturer.

Continuing to respond to customer demands with products in sizes appropriate to the needs, fulfilling different technical functions and with woven or knitted fabric options from different yarn blends all around the world, Aleze Textile produces 10 million+ meters laminated fabric annually with the hot-melt technique and meets market needs with any certification required for the customized and/or standard products.

ALEZE  TEKSTİL

Our Mission

Our mission is to increase the market share with innovative, high quality and fast-responsive production and delivery, by focusing on continuous customer satisfaction, with the efficient use of resources and environmental perspective approaches.

Our Vision

OUR RECENT AND CURRENT PERIOD PROJECTION:

In the global market, in the field of technical textiles, our recent and current period projection is to increase the product variety and function in line with customer demands by forcing the possibilities of existing technology.

OUR NEAR FUTURE PROJECTION:

Our near future projection is to increase the quality, to increase the production volume and market share by focusing on R&D and design activities, with the support of information technologies.

OUR FUTURE COMPANY PROJECTION:

Our future projection is to be the world leader by increasing the added value of its products in our field of activity, using the latest technology, and building a sustainable brand.

A close-up photograph of industrial textile machinery. A large roll of white fabric with a wavy, textured pattern is being processed. A metal frame with a hand crank is visible on the right side of the machine. The background shows a dark ceiling with rows of lights.

Factory.

Precise Production Redefined

Under the roof of Aleze Textile, customer-specific requests for technical specifications, optimal time planning for on-time and clean delivery, sensitivity to resource utilization with high efficiency, production with minimum defects are considered as the key pillars of the precise manufacturing.

One of the greatest advantages that sets Aleze Tekstil ahead of its competitors both locally and globally is its dynamic scalability, allowing the business to adapt flexibly to customer-specific demands.

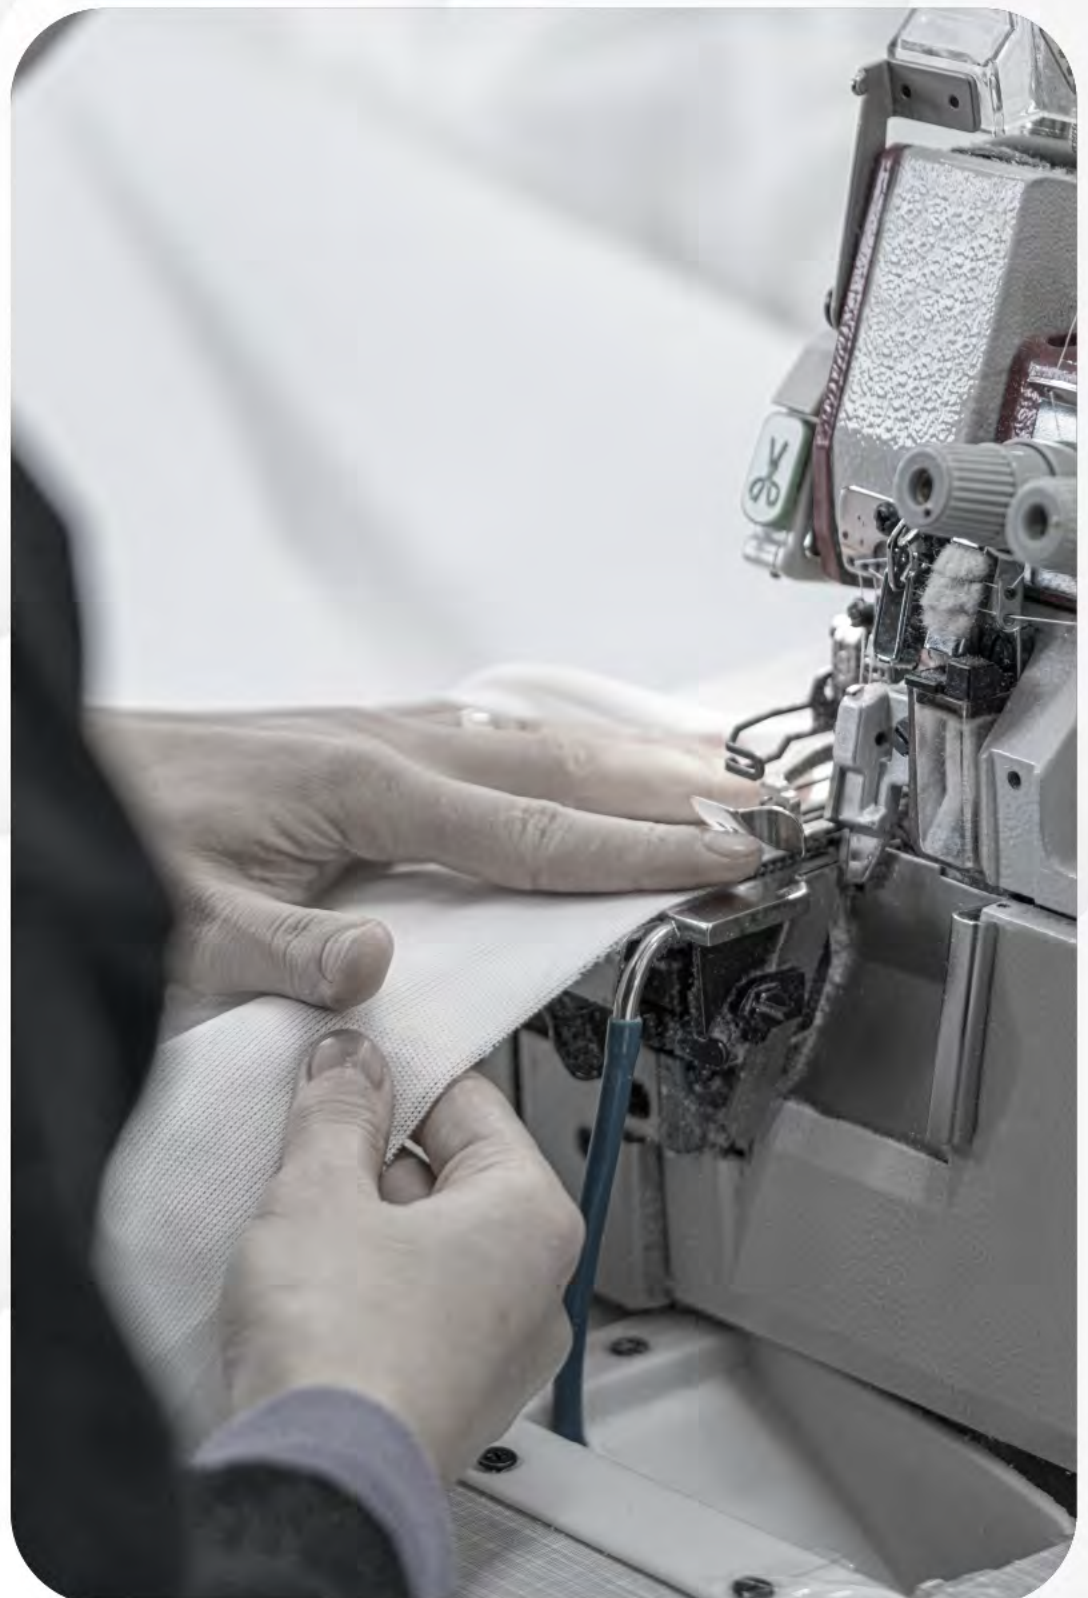

Maintaining raw materials in stock ready for production at all times, fostering long-term and quality-focused relationships with suppliers, and Aleze Tekstil's unique sewing and packaging techniques for durable products are essential principles.

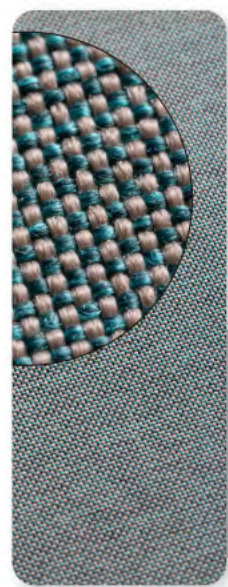

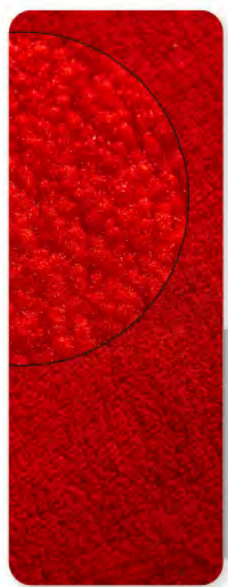

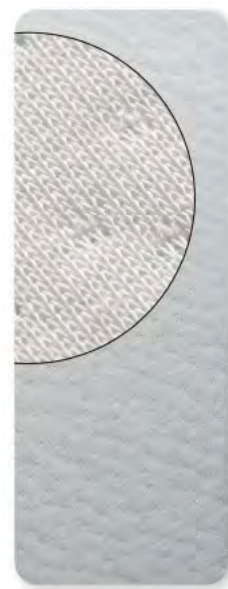

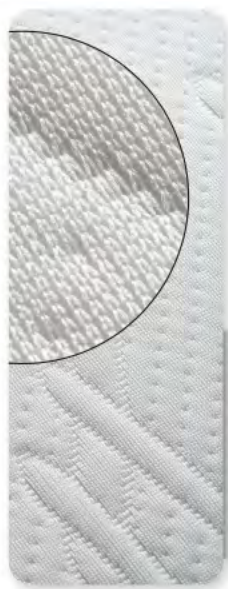

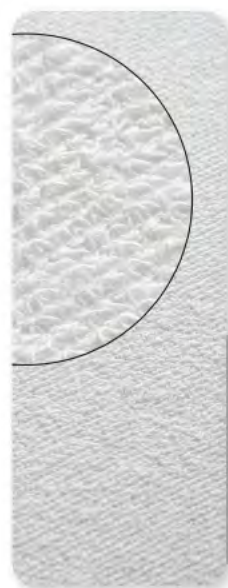

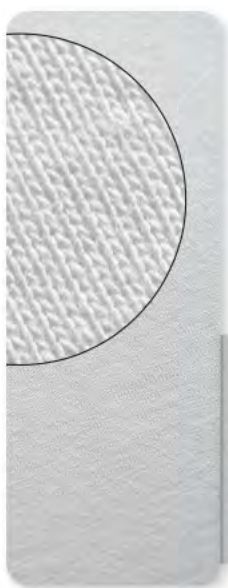

Aleze Tekstil excels in offering quick and solution-oriented services for all types of packaging, labeling, and accessories in products presented as either finished goods or intermediate products.

The experience and expertise in utilizing technology to meet customer demands, combined with technical knowledge, provide the capability for custom manufacturing tailored to customer requirements.

Your Choice All Applicable

Best lamination solutions for improved quality and compliance with technical specifications required.

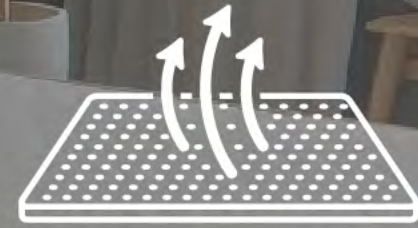

* Fabric yarn blends may vary according to the customer technical requirements.

LIQUID-PROOF

Our mattress protectors, laminated with PU membrane produced using high technology, provide 100% protection against liquid penetration to the mattress.

BREATHABLE

Our specially laminated mattress protectors, with their micro porous structure, ensure bidirectional air flow and breathability.

HIGH DURABILITY

The high-quality fabric used in our mattress protectors, combined with perfect lamination and special sewing techniques, ensures our products offer high durability for daily use and repeated washing over many years. Our mattress protectors also offer excellent durability in scenarios with higher usage frequency, such as hotels and hospitals, as well as in industrial applications.

SAFELY WASHABLE*

NATURAL & SUSTAINABLE

The sustainability and eco-friendliness of our mattress protectors, produced with an environmentally friendly approach throughout all manufacturing processes, are assured by their success in global certification processes.

ANTI BUG & MITE

Through the successful implementation of modern technical textile production processes, our mattress protectors possess anti-bug and anti-mite features.

RUSTLE-FREE

The PU membrane laminated onto our high-quality fabrics ensures completely silent and rustle-free sleep comfort.

WRINKLE-FREE

Our mattress protectors, perfected through years of research and development processes, stretches and perfectly fits on the mattress and are wrinkle-free and offer easy usability.

*Washing instructions must be taken into consideration.

FITTED Mattress Protector.

Specifications

It provides high liquid impermeability and durability with a laminated superior quality membrane with different size options that perfectly surround the bed.

While the upper surface fabric options may vary according to customer demands, additional technical functions such as anti-bug, anti-mite and odor eliminator features etc. can also be applicable.

While protecting the bed with full flexibility, the unique technical rubber stitching surrounding the bed allows the product to be used for many years without deformation.

Washing & Care Instructions

For our quilted protector products, the maximum washing temperature is 60°C, while for all other fabric type protectors the maximum washing temperature is 90°C.

Standard Production Sizes

70x140	140x200
70x190	150x200
90x190	160x200
100x200	180x200
110x200	200x200
120x200	240x240

*All measurements presented here are in centimeters.

**Special sizes may be provided according to customer demand, with a maximum width of 250cm.

PREMIUM COMFORT

Yarn blend options:

- 100% cotton
- 80% cotton 20% polyester
- 50% cotton %50 polyester
- 100% tencel
- 100% polyester
- 100% organic cotton

* The fabric type varies according to customer demand with different yarn blend options.

4-CORNER ELASTIC Mattress Protector.

Specifications

-It provides high liquid impermeability and durability with a laminated superior quality membrane with different size options that perfectly covers the upper surface of the mattress.

-It can be easily attached and removed from the mattress thanks to the elastics on its four corners. It is one of our most preferred product types for hotel and hospital use due to its ease of replacement and practicality.

-While the fabric options may vary according to customer demands, additional technical functions such as anti-bug, anti-mite and odor eliminator features etc. can also be applicable.

-Thanks to the high quality and non-deformable feature of the elastics (can be sewn in the desired thickness according to customer demand) that hold the product to the mattress at its four corners, it does not slip, fully protects the mattress, and thus provides comfortable sleeping comfort.

Washing & Care Instructions

For our quilted protector products, the maximum washing temperature is 60°C, while for all other fabric type protectors the maximum washing temperature is 90°C.

Standard Production Sizes

70x140	140x200

100% cotton

80% cotton 20% polyester

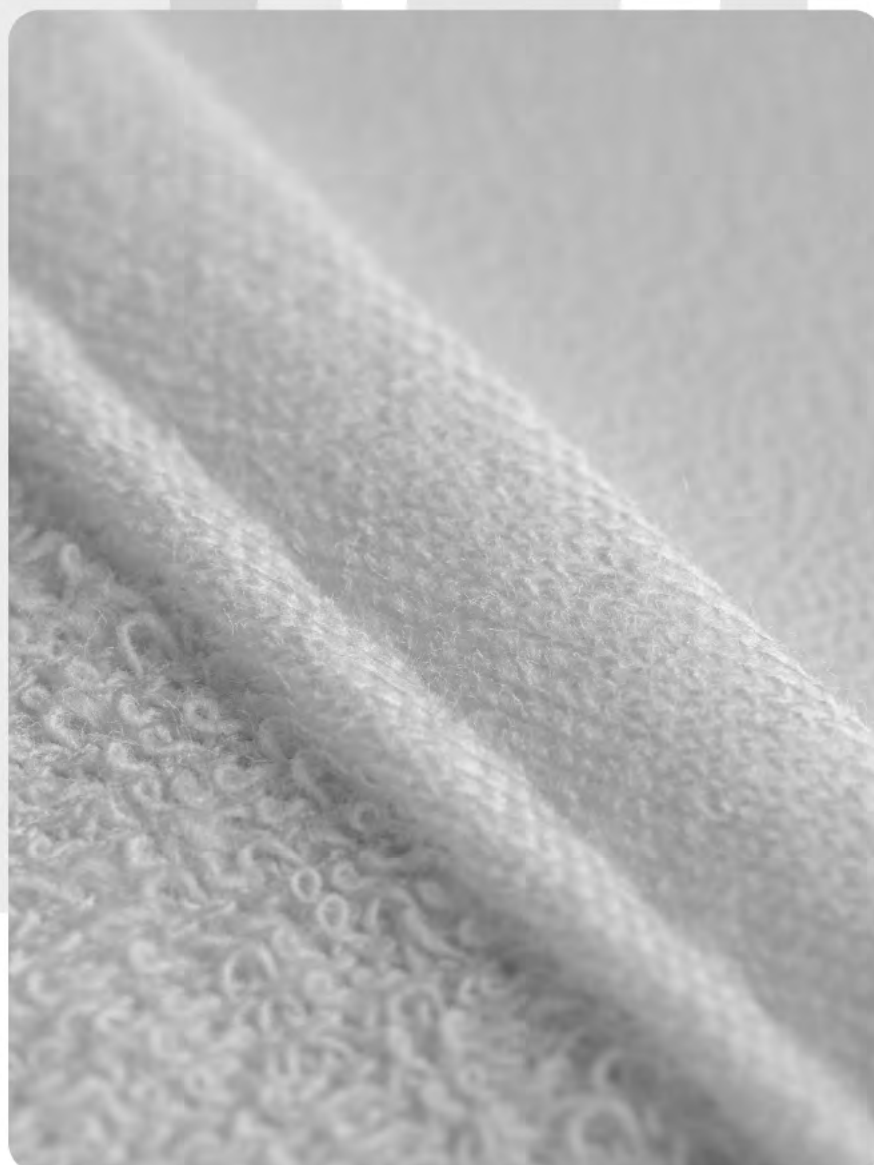

50% cotton %50 polyester

100% tencel

100% polyester

100% organic cotton

* The fabric type varies according to customer demand with different yarn blend options.

FULLY ENCASED Mattress Protector.

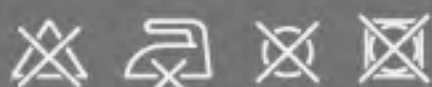

Specifications

It provides high liquid impermeability and makes the mattress resistant to dust, moisture and bed bugs and prevents allergens from coming into contact with the user. It is especially advantageous for areas of use such as hotels and hospitals where more protection is needed due to the number and variety of users of the mattress, as it will extend the life of the bed.

This design completely surrounds the mattress including the underside, which makes it possible to use by changing the sides as it has a silent and deformation-free structure for sleeping comfort.

While the fabric options may vary according to customer demands, additional technical functions such as anti-bug, anti-mite and odor eliminator features etc. can also be applicable.

Washing & Care Instructions

For our quilted protector products, the maximum washing temperature is 60°C, while for all other fabric type protectors the maximum washing temperature is 90°C.

PILLOW Protector.

Zipper & Envelope

Specifications

It provides high liquid impermeability and durability with a laminated superior quality membrane that perfectly fits the pillow.

While the upper surface fabric options may vary according to customer demands, additional technical functions such as anti-bug, anti-mite, and odor eliminator features etc. can also be applicable.

While protecting the pillow with full cover, the unique technical rubber stitching surrounding the pillow allows the product to be used for many years without deformation.

Pillow protectors are offered in two options, zippered (with different cursor alternatives) and envelope form, depending on customer preference.

Washing & Care Instructions

For our quilted protector products, the maximum washing temperature is 60°C, while for all other fabric type protectors the maximum washing temperature is 90°C.
